DETAILED ACTION

1. In the remarks filed on October 12, 2006, Applicant amended claims 2 and 7-15, cancelled claims 1 and 3-6, and submitted arguments for allowability of pending claims 2 and 7-15.

Allowable Subject Matter

2. Claims 2 and 7-15 allowed.
3. The following is an examiner's statement of reasons for allowance:

Regarding claims 2 and 7-15, none of the references of record, alone or in combination, suggest or fairly teach the limitations of independent claims in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to disclose **tilt detection means for detecting the relative inclination between the objective lens and the information recording medium, wherein the interval between the second and third splitting lines is narrower than the width, in the longitudinal direction of the information track of the information recording medium, of the region in which 0-order light and ± 1 -order light that are diffracted at the information track of the information recording medium are superimposed; and wherein the tilt detection means compares the phase of the first push pull signal obtained by calculating signals detected by receiving light fluxes created by laser light passing through the two regions that are disposed between the second and third splitting lines, and of a second push pull signal obtained by calculating signals detected by receiving light fluxes created by laser light**

passing through the entire region of the light splitting means, to generated a tilt error signal for detecting the relative inclination between the objective lens and the information recording medium.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
